

Serial No. 10/813,508

**AMENDMENT TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application:

**LISTING OF CLAIMS**

Claim 1 (currently amended): A racket frame structure, comprising:  
a main body having an inner side wall and an outer side wall;  
the inner side wall of the main body having two opposite sides each formed with a plurality of reinforcement ribs arranged in a symmetric manner;  
a plurality of main strings and a plurality of cross strings mounted in the main body to form a racket face, wherein the reinforcement ribs are located at connections of the main strings and the cross strings on the main body.

Claim 2 (original): The racket frame structure in accordance with claim 1, wherein the main body is made of an aluminum alloy.

Claim 3 (canceled)

Claim 4 (currently amended): The racket frame structure in accordance with claim 1, wherein the main body is formed with a plurality of string holes each extended through the inner side wall and the outer side wall of the main body, and each [[of]] located between the reinforcement ribs at the two opposite sides of the inner side wall of the main body is located beside the string holes.

Claim 5 (original): The racket frame structure in accordance with claim 1, wherein each of the reinforcement ribs is formed by a punching process.

Claim 6 (original): The racket frame structure in accordance with claim 1, wherein each of the reinforcement ribs is formed by a rolling process.

Claim 7 (original): The racket frame structure in accordance with claim 1, wherein each of the reinforcement ribs is recessed.

Claim 8 (currently amended): The racket frame structure in accordance with claim 7, wherein each of the reinforcement ribs has an elongated recess extended through a determined length of the inner side wall of the main body and having a mediate portion and two distal ends, and the elongated recess of each of the reinforcement ribs has a depth gradually increased from each of the two distal ends to the mediate portion thereof.

Serial No. 10/813,508

Claim 9 (currently amended): The racket frame structure in accordance with claim 8, wherein the main body has different cross sections by provision of the reinforcement ribs so that the different cross sections of the main body have different thickness.

Claim 10 (original): The racket frame structure in accordance with claim 7, wherein each of the reinforcement ribs has a constant depth.

Claim 11 (original): The racket frame structure in accordance with claim 1, wherein each of the reinforcement ribs is protruding outward.
